

Poll Research Results

February 21, 2009

This week's poll results, once again, measure investor perspectives about dealing with a recession. The poll was not scientific and was driven by radio listeners of the syndicated Don Creech Radio Show (www.DonCreech.com).

1. Have you personally tried to reduce your household or personal spending because of a concern of this economy?

2. Does the current economic situation in the United States make you feel more anger or more fear?

3. Does the government have a responsibility to rescue failing financial institutions?
